

近期代表成果

W. L

Concentration-Induced Association in a Protein System Caused by a Highly Directional Patch Attraction, *Journal of Physical Chemistry B*, 2016

Strings and stripes formed by a protein system interacting via a single-patch attraction, *Soft Matter*, 2016

Charge-Induced Patchy Attractions between Proteins, *Journal of Physical Chemistry B*, 2014

Mechanistic studies of an automated lipid nanoparticle reveal critical pharmaceutical properties associated with enhanced mRNA functional delivery in vitro and in vivo, *Journal of Small*, 2021

Quantitative Evaluation of Dendritic Nanoparticles in Mice: Biodistribution Dynamics and Downstream Tumor Efficacy Outcomes, *Journal of Molecular Pharmaceutics*, 2021

The Global Characterisation of a Drug-Dendrimer Conjugate - PEGylated poly-lysine Dendrimer, *Journal of Pharmaceutical Sciences*, 2022

Impact of the Critical Quality Attributes of Poly(lactic acid)–Poly(ethylene glycol) Polymeric Nanoparticles on Biodistribution, *ACS Nano*, 2023

[L. Gentile](#)

Out-of-equilibrium Soft Matter. *The Royal Society of Chemistry*, 2023-03-24 | Edited book

Removal of Pollutants by Ferrihydrite Nanoparticles Combined with Brij L4 Self-Assembled Nanostructures. *ACS Applied Nano Materials*. 2022

Biobased Approach for Synthesis of Polymers and Sustainable Formulation of Industrial Hardeners. *Coating*, 2022

Optimum formulation conditions for cationic surfactants via rheo-titration in turbulent regime. *Colloidal and Surface*, 2022

Understanding the self-assembly of the polymeric drug solubilizer Soluplus®. *Journal of Colloid and Interface Science*, 2022

Protein–polysaccharide interactions and aggregates in food formulations, *Current Opinion in Colloid and Interface Science*, 2020

Shape and Phase Transitions in a PEGylated Phospholipid System, *Langmuir*, 2019

Non-lamellar lipid assembly at interfaces: controlling layer structure by responsive nanogel particles, *Interface Focus*, 2017

[J. Lawrence](#)

Impact of drug aggregation on the structural and dynamic properties of Triton X-100 micelles. *Nanoscale*. 2022.

Nanoscale Structure and Dynamics of Model Membrane Lipid Raft Systems, Studied by Neutron Scattering Methods. *Frontiers in Physics*, 2022

NSAID solubilisation promotes morphological transitions in Triton X-114 surfactant micelles. *Journal of Molecular Liquids*, 2022

Nucleic Acid-Loaded Lipid Nanoparticle Interactions with Model Endosomal Membranes. *ACS applied materials & interfaces*, 2022

On the interactions of diols and DMPC monolayers. *Journal of Molecular Liquids*. 2022

Interplay of lipid and surfactant: Impact on nanoparticle structure. *Journal of Colloid and Interface Science*. 2021

The impact of lipid digestion on the dynamic and structural properties of micelles. *Small*. 2021

Supramolecular Architecture of a Multi-Component Biomimetic Lipid Barrier Formulation. *Journal of Colloid and Interface Science*, 2020

On the structure of solid lipid nanoparticles. *Small*, 2019
